

**Deliverable D7.2.1**

**Early Prototype and Validation Report SEARCH**

Editor:	Jörg Schindler, ZATTOO
Authors:	Jörg Schindler, ZATTOO; Blaz Novak, JSI
Deliverable Nature:	Prototype (P)
Dissemination Level:	Consortium (CO)
Contractual Delivery Date:	M12 – 31 October 2013
Actual Delivery Date:	M12 – 31 October 2013
Suggested Readers:	All project partners
Version:	1.0
Keywords:	Cross-media content linking and recommendations, In-scene video search, Zattoo use case

## Executive Summary

This document describes the early prototype for search and recommendations. For several news-centric TV channels in three different languages, in close-to-realtime, related contents are recommended. Recommendations span across media types (news articles, social media and TV) and across languages, thus creating content linkings that make it easy for the user to continue watching, to read related content or to discuss about topics that are just being shown in TV. Furthermore, the prototype allows searching for contents in TV based on speech-to-text transcripts of the spoken language rather than pure curated programme metadata.
